Subject Index to Volume 16

Acetylacetonate, polymerization of methyl methacrylate in the presence of copper(II) acetylacetonate, 2995

Acetylation of DMSO-paraformaldehyde solutions of cellulose, 1

Acetylenic monomers, copolymerization with 1,3-dienes, 1609

Acrylamide, copolymerization with allylamine, 305

——, Copolymerization of vinyl monomers with irradiated acrylamide crystals, 2899

——, effect of oxygen on the radical polymerization in ethanol and water, 981

Acrylates, alternating copolymers of propylene with alkyl acrylates, 2795

Acrylonitrile, aqueous polymerization initiated by the bromate–thiourea redox system, 343

——, bulk polymerization by nitrogen peroxide, 3281

——, copolymerization with vinylcyclohexane and methylvinylcyclohexane, 3233

——, kinetics of Ce(IV)–acetophenone-initiated polymerization in acetic-sulfuric acid, 391

——, specificity of the exothermic reaction of polyacrylonitrile, 3031

Adsorption modification of minerals as polymer fillers, 2883

Aldehyde cyclotrimerization of ether oxygen-substituted aliphatic aldehydes, 2327

Aldehyde polymerization, anionic polymerization of 4,7-dioxaoctanal and *n*-octanal, 435

Aldehyde polymers, polybromodichloroacetaldehyde, 1311

Allenes, polymerization of alkoxyalenes by transition-metal catalysts, 615

——, polymerization of propadiene, 1,2-butadiene, and 3-methyl-1,2-butadiene by transition-metal catalysts, 701

Allyl alkyl maleates, effect of alkyl substituent on the cyclopolymerization, 2695

Allylamine, copolymerization with acrylamide, 305

Allyl methyl maleate, cyclopolymerization, 1081

Alternating copolymerization, of acrylonitrile with butadiene, organometallic compounds as catalysts, 861

——, of benzofuran and acrylic monomers in the presence of organoaluminum compounds, 2943

——, of benzofuran with crotononitrile and α-chloroacrylonitrile, 2953

——, of isobutylene and methyl acrylate by an ethylaluminum sesquichloride-peroxide initiator, 1747

——, of propylene and alkyl acrylates, 2795

——, of propylene oxide and carbon dioxide with an alumina supported diethylzinc catalyst, 2383

Alternating copolymerizations of styrene and acrylic monomers initiated with carbanions in the presence of $ZnCl_2$, 721

Alternating and random hybrid fluorocarbon–fluorosilicone copolymers, 1929

α-Amino acids, activation by polymers containing 1,3,4-oxadiazoline-5-thione structure, 457

Amino acids, multichain copoly(α-amino acid), preparation and properties of multi-N^{ϵ}-poly(γ-benzyl-L-glutamyl)copoly(L-lysine γ-methyl-L-glutamate), 2001

——, poly-*N*-acetylaminoacrylic acid and poly(aminoacrylic acid), 3275

Anhydrosugar polymerizations, an analytical evaluation, 2217

Anionic polymerization, of 1,2-butylene oxide, 561

——, of *p*-diisopropenylbenzene in THF, 1187

——, of 4,7-dioxaoctanal and octanal, 435

——, kinetics of styrene polymerization initiated by barium, 1297

——, of β-nitrostyrenes, 937

——, preparation of dicarbanionic oligostyrylbarium and strontium in tetrahydrofuran, 1285

——, of *o*-substituted β-nitrostyrenes, 961

——, synthesis of block copolymers of styrene, isoprene, and ethylene oxide, 511

Anodically initiated radical polymerization of methyl methacrylate by tetrabutylammonium salts, 1659

Anthryl, photodimerization of polymer bound anthryl groups, 2729

Aramids, photodegradation by irradiation in the absence of oxygen, 2353

——, photodegradation by irradiation in air, 2365

Asymmetric induction copolymerization of 1-methyl vinyl ether with styrene and *N*-phenylmaleimide, 129

Aziridines, selective reactivity of 1-(*N*-substituted-carbamyl)aziridine for ring-trans-

formation reactions and ring-opening polymerization, 1037
Azoesters, use in the preparation of $(AB)_n$-type block copolymers, 1807
Azopolymers, new aromatic azopolymers, 2671
Azulene containing acrylates, synthesis and polymerization, 2085

Benzene, polymerization to poly-*p*-phenylene by aluminum chloride–air–water, 1147
Benzimidazole polymers, from aromatic dinitriles and aromatic diamines, 2275
——, from bisorthoester intermediates, 1831
2-Benzothiazolyl dithiolesters for the synthesis of polyamides under mild conditions, 475
Benzotriazolides, synthesis exchange reactions of some polymeric benzotriazolides, 1435
Biphenylene, poly(dimethyl biphenylene), 3151
Bis(2-cyanoacrylate) monomer syntheses via anthracene adducts, 2475
Bisketenimines, synthesis of poly(*N*-acrylamides) from bisketenimines and dicarboxylic acids, 667
Bisorthoesters as polymer intermediates, synthesis of bisorthoesters, 1815
——, a facile method for the preparation of polybenzimidazoles, 1831
Block copolycondensates containing polysiloxane and unsaturated polyester blocks, poly(unsaturated esters-*b*-siloxanes), 3157
——, poly(butadienes-*b*-siloxanes), 3165
Block copolymers, of the $(AB)_n$-type by use of polyazoesters, 1807
——, containing poly(ferrocenylmethyl methacrylate units), 1197
——, of ethylene and butadiene, 2891
——, of isobutylene and styrene by cationic polymerization, 243
——, of styrene, isoprene, and ethylene oxide by anionic polymerization, 511
——, triblock styrene-*t*-butylstyrene–styrene copolymers, by living radical polymerization, 469
——, of vinyl chloride, ozonized polypropylene oligomers as heterofunctional initiator, 3077
——, ——, synthesis and characterization of vinyl chloride block copolymers, 3091
——, ——, physical properties and morphology of block copolymers of PVC, 3107
Boron halides, polymerization of styrene with BF_3, BCl_3, and BBr_3, 2191
Butadiene, cationic polymerization of dimethyl-1,3-butadienes, 1449
Butene, structure of low molecular weight polymers by cationic polymerization, 1173
t-Butoxy radicals, reactions with vinyl monomers, 1709
1,2-Butylene oxide, cationic and anionic polymerization, 561

CIDNP studies, photolysis of poly(methyl isopropenyl ketone) and its model compounds in solution, 2747
Carbazole, cationic polymerization of *N*-ethyl-3-vinylcarbazole, 761
Carbon suboxide polymer, a photosensitive paramagnetic ladder polymer, 1909
N-Carboxy anhydride of N^{ϵ}-carbobenzyloxy-L-lysine reacted with copoly(L-lysine γ-methyl-L-glutamate), 1107
Catalysis, of hydrolysis of a Schiff base by a carboxyl-containing poly(ethylenimine) derivative, 1943
——, by polymer complexes, enhanced nucleophilic reactivity of hydroxamate anions bound to quaternized polyethylenimines, 1865
Cation-exchanging macroreticular composites, 2345
Cationic dimerization, of 1,1-diphenylethylene, cocatalytic and direct initiation with titanium tetrachloride, 3047
——, of diphenylethylene, kinetics of initiation by aluminum chloride, 3065
Cationic polymerization, with boron halides, polymerization of styrene with BF_3, BCl_3, and BBR_3, 2191
——, of 1,2-butylene oxide, 561
——, of dimethyl-1,3-butadienes, 1449
——, of isobutylene by 3-chloro-1-butene/trivinylaluminum, 833
——, of styrene by acetyl perchlorate or iodine, common-ion salt and steric structure effects, 503
——, of styrene by metal halide and nonmetal halide initiators, 2675
——, synthesis of poly(isobutylene-*b*-styrene) and poly(styrene-*b*-isobutylene) with boron halides, 243
——, vinylation of organic halides with trivinylaluminum as a model for termination in cationic polymerization, 821
Cellulose, acetylation of, in DMSO-paraformaldehyde solutions, 1
——, dielectric properties, 89
——, dielectric study of viscose rayon and viscose hydrocelluloses, 2019
——, grafting of vinyl acetate onto cellulose with free radical initiators, 295
——, mechanism of transition between cellulose I and II during mercerization, 1335
Cellulose acetate membrane, freeze-dried, gas permeation in, 3249
Cellulose phosphonate, modified with di-

methylacrylamide and 4-vinylpyridine, flame-retardant properties, 2771
Cerium(IV)-acetophenone-initiated polymerization of acrylonitrile in acetic-sulfuric acid, 391
Chain transfer by hydrogen in olefin polymerization with organometallic catalysts, 2337
Charge-transfer complexes, amine–choranil complex as inhibitors for methyl methacrylate polymerization, 1475
——, in the free-radical copolymerization of styrene and fumarodinitrile, 1137
Chitin, ESR observations, 1163
Chlorinated PVC, chlorination of 2,4-dichloropentane as a model, 3285
——, chlorination of β,β-d_2 as model for determination of the mechanism, 889
——, structure, 2539
Chlorophosphines, effects on the radical polymerization of methyl methacrylate, 41
Chromatography, resolution of mandelic acid derivatives on cyclodextrin gels, 189
Cobaloxime bound to polystyrene reactivity, 2453
Combustion, structure and extinction of counterflow diffusion flames above condensed fuels, poly(methylmethacrylate) and its monomer, 1755
Conformation, of poly(methacrylic acid) chain containing nonionic hydrophilic units, 2183
——, properties of poly(α-isobutyl-L-aspartate), 2237
Copolymerization, improved methods of estimating reactivity ratios by considering experimental errors in both variables, 2913
——, reactivity ratios estimated by nonlinear least-squares procedure, 1719
——, of styrene with vinyl acetate in presence of tributyl amine, 2527
——, termination rate in radical copolymerization, 2725
Crosslinking, of butadiene polymers by styrene grafting, 49
——, monomers, selective initiation of vinyl ether-β-nitrostyrene monomers, 1343, 1359
——, ——, selective initiation of vinyl ether–styrene monomers, 1367, 1375
Crystalline copolymers of ethylene–butadiene, physicochemical study, 115
Crystallized polymers, quasi-equilibrium states of copolymers that simultaneously crystallize and interchange structural units, 2651
Crystal structure of calcium acrylate dihydrate at 183K, 2265
Cyanoacrylates, synthesis of bis(2-cyanoacrylate) monomers via anthracene adducts, 2475
Cyanato group polycyclotrimerization, study of gel formation, 1697
Cyclopolymerization, effect of alkyl substituent on the polymerization of aklyl allyl maleates, 2695
——, of methyl allyl maleate, 1081
Cyclotrimerization, of ether oxygen-substituted aliphatic aldehydes, 2327

Degradation, of head-to-head PVC, 2593
——, of polymer mixtures, blends of polystyrene and polybutadiene, 2169
——, of salts of poly(methacrylic acid), lithium, sodium, potassium, and cesium salts, 3201
Diacetone acrylamide, polymerization in the presence of metal acetylacetonates and peroxide, 309
Diallyl phthalate prepolymers, characterization by gel-permeation chromatography, 107
Dielectric properties, of moist cellulose, 89
——, of polystyrene, effect of photooxidation, 1123
——, of wood pulp, 1443
Dielectric studies of photodegradation and photooxidation of polystyrene, 13
Dielectric study of viscose rayon and viscose hydrocelluloses, 2019
Diene–dienophile copolymers, structure of furan–maleic anhydride copolymers, 1527
1,3-Dienes, copolymerization with acetylenic monomers, 1609
Diffusion flames above condensed fuels, comparison of poly(methyl methacrylate) and its monomer, 1755
p-Diisopropenylbenzene, anionic polymerization in THF, 1187
Dioxaphospholans, poly(alkyl ethylene phosphates) from 2-alkoxy-2-oxo-1,3,2-dioxaphospholans, 1275
Diphenylethylene dimerization, cocatalytic and direct initiation with titanium tetrachloride, 3047
——, kinetics of initiation by aluminum chloride, 3065
Dipole moment characterization of phenol-, *o*-cresol, and *p*-cresol-formaldehyde resins, 275
Donor–acceptor complexes in copolymerization, structure of furan–maleic anhydride copolymers, 1527
Dye binding, excitation energy transfer in cationic dye-polyanion system, 2411
——, fluorescence of 2-*p*-toluidinylnaphthalene-6-sulfonic acid in the presence of synthetic polyacid and polybase, 327
——, by synthetic polyacids, effect of polyion conformation, 77
——, thermodynamics of binding of 2-*p*-tolui-

dinylnaphthalene 6-sulfonate by polyvinylpyrrolidone, 2663
Dye-sensitized photoinitiated cationic polymerization, 2441
Dyes, synthesis and properties of polymeric azine and thiazine dyes, 1853

ESCA, investigation of sample-charging phenomena, 1461
——, study of gas-plasma treated ethylene–tetrafluoroethylene copolymer, 911
——, studies of polymer films produced by inductively coupled RF plasmas excited in vinylidene fluoride, 1093
——, systematic investigation of the core levels of simple homopolymers, 791
ESR, observations of chitin, 1163
——, studies of reaction intermediates in γ-irradiated poly(methyl methacrylate), 2689
——, studies of trapped free radicals and polymer deposition in xylene plasmas, 3213
——, study of γ-irradiated 1,3,5-trithiane and its derivatives, 2989
Electroconductivity of 7,7,8,8-tetracyanoquinodimethane salts containing polycation polymers, 3259
Electroinitiation, alternating copolymerization of styrene and acrylic monomers in the presence of $ZnCl_2$, 721
——, of methyl methacrylate in the bulk by tetrabutylammonium salts, 1659
Electron diffraction studies of multilayers of vinyl stearate, 1431
Electron-donor, electron-acceptor monomer systems, copolymerization and hompolymerization by Lewis acids, 867
Emulsion polymerization, particle nucleation in emulsion polymerization, a theory for homogeneous nucleation, 1953
——, of styrene in aqueous media, kinetics and mechanism, 1517
——, of styrene, effect of homologous series of alkyl sulfate surfactants, 677
——, of tetrafluoroethylene by radiation, polymerization rate and molecular weight, 2929
Enamines, polyenamines by vinylogous nucleophilic substitution polymerization of 1,6-diethoxy-1,5-hexadiene,3,4-dione with diamines, 2807
Epiiodohydrin polymer, 2343
Epoxidized polyisoprene, ^{13}C NMR study, 2983
Epoxy polymers, insertion of oxirane rings into ester bonds of polyesters, 1643
Ethylene–butadiene copolymer, physicochemical study of polymer crystals, 115
Ethylene polymerization by supported bis(indenyl)- and bis(fluorenyl)-chromium catalysts, 771
Ethylene and propylene oxide copolymers, kinetic analysis by mass spectrometry, 685, 997
N-Ethyl-3-vinylcarbazole, cationic polymerization, 761

Ferrocene–containing polymers by modifications of halogen-containing polymers, 71
Ferrocenylmethyl methacrylate block copolymers, 1197
Fiber thermal characterization and wet spinning, of copoly(4,4′-oxanilideterephthalamide-4,4′-phenyleneterephthalamide), 2151
——, of poly(4,4′-oxanilideterephthalamide) and copolymers, 2141
Fillers, adsorption modification of minerals as polymer fillers, 2883
Fire retardant, influence of ammonium polyphosphate on the thermal degradation of poly(methyl methacrylate), 95
Flame-retardant, cellulose phosphonate modified with dimethylacrylamide and 4-vinylpyridine, 2771
Fluorescence of 2-*p*-toluidinylnaphthalene-6-sulfonic acid in the presence of synthetic polyacid and polybase, 327
Fluorescent, hydrophobic probes, binding of 2-*p*-toluidinylnaphthalene 6-sulfonate to polyvinylpyrrolidone, 2663
Fluorocarbon ether bibenzoxazole polymers, 2815
——, glass transition temperature, 2831
Fluorocarbon–fluorosilicone copolymers, properties of random and alternating hybrid copolymers, 1929
Formamidinium salts, polymerization to polyamides, 2303
Four-center-type photopolymerization in the crystalline state, characteristic features of topochemical process and polymer properties, 2113
Fumarodinitrile–styrene charge-transfer complexes in free-radical copolymerization, 1137
Furan polyesters, thermally initiated crosslinking of an unsaturated heterocyclic polyester, 2407

Gas chromatography and GC/MS, study of the mechanism of polysulfone decomposition by pyrolysis, 353
Gas-chromatography–mass spectrometry, analysis of volatile constituents in commercial polymers by direct thermal desorption, 2703
Gas permeation in freeze-dried cellulose acetate membrane, 3249

Gelatin, graft copolymerization of methyl acrylate onto gelatin, 3287
Gel-permeation chromatography of diallyl phthalate prepolymers, 107
Glass transition temperature of fluorocarbon ether bibenzoxazole polymers, 2831
Graft copolymerization, of butadiene on PVC, kinetic studies, 2873
——, effect of preswelling on radiation-induced graft polymerization, 179
——, of methyl acrylate onto gelatin, 3287
——, of pivalolactone of EPDM, 539
——, on polyacrylonitrile using hydrogen sulfide-halogen grafting system, 713
——, of polyethylene by mutual γ-irradiation in methyl acrylate vapor, 1883, 1897
——, of poly(hexamethylene adipamide) and poly(*m*-phenylene isophthalamide), 533
——, of styrene on polyethylene by irradiation, 1539
——, of styrene on polymers of butadiene, 49
——, of vinyl acetate on cellulose using free radical initiators, 295
——, of vinyl acetate on wool using Fenton's reagent, 1801
Graft polymerization of styrene on silica gel by radiation, 2607

Haloaldehyde polymers, polybromodichloroacetaldehyde, 1311
Halogen displacement polymerization of halophenols by basic-copper catalysts, 379
Hydrogen bonding, effect on the acid character of some synthetic copolymers, 2377
Hydrogen peroxide decomposition catalyzed by Cu(II)–poly(vinyl alcohol) complex, 447
Hydroquinone, determination in hydroquinone–phenol redox copolymers using diphenylpicrylhydrazyl, 299

Imidazole containing polymers as catalysts for hydrolysis, modified polyethylenimines, 1265
Inhibitors for radical polymerization of methyl methacrylate, amine–choranil charge transfer complex, 1475
Initiating systems, 2-mercaptoethanol–halogen redox systems, 717
Ion-exchange, membranes, change of transport properties of cation-exchange membranes by various polyelectrolytes, 1063
——, resins, radical polymerization of methyl methacrylate by sodium polystyrene sulfonate, 707
γ-Irradiated aromatic compounds in poly(methyl methacrylate), solute radical ion yields, 1487
γ-Irradiated poly(methyl methacrylate), ESR studies of reaction intermediates, 2689
Irradiation, surface grafting of polyethylene by mutual irradiation in methyl acrylate vapor, 1883, 1897
Isatoic anhydrides, synthesis of monomers and copolymers from, 2679
Isobutylene oxide, radiation-induced graft copolymerization of poly(isobutylene oxide), 179
Isobutylene, synthesis of α,ω-diene-polyisobutylene, 833
Isoprene, polymerization by the reaction products of η^3-allyl complexes of transition metals and titanium chlorides, 2159
Itaconimide, thermoset polyimide resins from *N*-substituted bisitaconimides, 137

Kinetic analysis of the photopolymerization of lauryl acrylate with a photoinduced chemical reaction calorimeter, 1175
Kinetics, of anionic polymerization of styrene with barium in THF, 1297
——, of *t*-butyl hydroperoxide initiated polymerization of methyl methacrylate in the presence of copper(II) acetylacetonate, 2683
——, and mechanism of the emulsion polymerization of styrene in aqueous media, 1517
——, of polyesterification, succinic acid and ethylene glycol, 1005
——, of polymer degradation in solution, 497

Lactone polymerization, stereoregular polymers from optically active β-propiolactones, 261
——, structure and properties of statistical and block copolymers of pivalolactone and α-methyl-α-propyl-β-propiolactone, 2617
Ladder polymers, poly(carbon suboxide), a photosensitive paramagnetic polymer, 1909
Lead(IV) polyesters, effect of reaction variables in the solution synthesis, 491
Limiting conversions in two-phase polymer reactions, 523
Liquid crystalline solvents, effect on the radical polymerization of alkyl methacrylates, 1027
Living radical polymerization, preparation of triblock styrene-*t*-butylstyrene-styrene copolymers, 469

Macroreticular composites, cation-exchanging composites, 2545
Maleimide, photolytic and radiolytic polymerization of *N*-ethylmaleimide in cyclohexene, 1779
Mass spectrometry, analysis of copolymers of ethylene and propylene oxides, 685
——, kinetic analysis of ethylene and propylene

oxide copolymers, 997
Mass spectroscopy, direct pyrolysis in the mass spectrometer of aromatic polysulfonates and thiosulfonates, 3131
Mechanism of methyl methacrylate radical polymerization in the presence of orthophosphoric acid, 2199
Membranes, change of transport properties of cation-exchange membranes by various polyelectrolytes, 1063
2-Mercaptoethanol–halogen redox initiating systems, 717
Methacrylate copolymers, pyrolysis of methyl methacrylate–methacrylic acid copolymers, 169
Methacrylate polymerization in liquid crystalline solvents, 1027
Methacrylic acid, collapsed conformation of polymer chains containing nonionic hydrophilic units, 2183
——, degradation of salts of poly(methacrylic acid), lithium, sodium, potassium, cesium salts, 3201
——, polymerization of peroxodisulfate in aqueous solution, 2701
Methyl methacrylate, effects of chlorophosphines on the polymerization, 41
——, influence on the thermal degradation of the polymer on ammonium polyphosphate, 95
——, kinetic regularities and mechanism of radical polymerization in the presence of orthophosphoric acid, 2199
——, photopolymerization with iodine monobromide as photoinitiator, 633
——, solute radical ion yields of γ-irradiated aromatic compounds in poly(methyl methacrylate), 1487
——, template polymerization in the presence of isotactic poly(methyl methacrylate), 427
——, thermal degradation of mixtures of poly(methyl methacrylate) and silver acetate, 2225
Microheterogeneity in crosslinked polysiloxanes, 597
Modification of polymers, condensation of polymeric aldehydes with the anion of an isoquinoline Reissert compound, 2089
Modulus, polyethylene terephthalate, 3311
Monoallyl phthalate, polymerization, 1421
Monte Carlo model, for copolymerization considering the penultimate effect, 1587
——, for copolymerization of methyl methacrylate/chloroprene and 2-hydroxyethyl methacrylate/alkyl acrylate systems, 1601
——, for copolymerization of styrene and benzylidenecyanoacetate esters, 1595

NMR analysis of oligomeric alkenyl polysulfide, 3293
^{13}C-NMR analysis of sequence distribution in acrylonitrile–vinylidene chloride copolymers, 3185
NMR, infrared and x-ray diffraction spectroscopy, microstructure determination of poly(1,3-pentadiene), 2285
^{13}C-NMR sequence analysis, anionic copolymerization of lactams, 2253
^{13}C-NMR spectroscopy, characterization of urea–formaldehyde resins, 2509
^{13}C-NMR spectroscopic study of epoxidized polyisoprene, 2983
^{1}H-NMR spectroscopy of partially saturated diene polymers, 2667
^{15}N-NMR spectroscopy, neighboring residue effects in sequence polymers containing glycylglycine units, 583
Nitrogen peroxide initiation of bulk polymerization of acrylonitrile, 3281
β-Nitrostyrenes, anionic polymerization, 937
——, a pronounced ortho effect in the polymerization of *o*-substituted β-nitrostyrenes, 961
Novolacs from the alkaline hydrolysis of cured phenol–formaldehyde resins at high temperatures, 1669
Novolac phenol–formaldehyde resins, chain-configurational properties, 659
Nucleation in emulsion polymerization, a theory for homogeneous nucleation, 1953
Nylon-6, the effect of water on the glass transition temperature and Young's modulus, 1229
——, sorption of ethane sulfonic acid, effect of end groups, 2393
Nylon 66 and polyacylonitrile, HCN evolution during thermal oxidative degradation, 2715

Olefin polymerization in liquid sulfur dioxide initiated by *m*-chloroperbenzoic acid, 2423, 2431
Olefin polymerization with organometallic catalysts, hydrogen chain transfer, 2337
Optically active polyamides derived from 2,6-diamino-6,2′-dimethylbiphenyl, 3005
Optically active polymers by asymmetric induction copolymerization of 1-menthyl vinyl ether with styrene and *N*-phenylmaleimide, 129
Optical resolution of mandelic acid derivatives by column chromatography on cyclodextrin gels, 189
Organoaluminum, effect on the alternating copolymerization of benzofuran and acrylic monomers, 2943
Organometallic polymers, block copolymers containing poly(ferrocenylmethyl methacrylate) units, 1197

——, organometallic modifications of halogen-containing polymers, 71
——, solution synthesis of lead(IV) polyesters, 491
——, synthesis of titanium(IV) polyamines, 2963
Oriented monomers, polymerization of 4-vinylpyridine perchlorate in micellar aggregates, 1495
1,3,4-Oxadiazoline-5-thione containing polymers, activation of *N*-protected α-amino acids, 457
Oxidation, molecular core binding and relaxation energies in a series of oxygen containing organic molecules, 3173
——, role of polymer morphology in the oxidation of polypropylene, 33
Oxidative degradation of vulcanized rubbers, diffusion effects, 1575
Oxidative stress relaxation and the measurement of sol fraction in rubber vulcanizates, 2063

1,3-Pentadiene, microstructure determination of polymer by infrared, NMR, and x-ray diffraction spectroscopy, 2285
Penultimate effect in copolymerization, Monte Carlo study, 1587
Peptides, ^{15}N-NMR spectroscopy, neighboring residue effects in sequence polymers containing glycylglycine units, 583
Perfluorocarbocyclic ethers and polyethers from hexafluorobenzene, 2781
Pharmacological polymers, synthesis and exchange reactions of some polymeric benzotriazolides, 1435
Phase formation and phase inversion during the precopolymerization of styrenemethyl methacrylate in rubber, 337
Phenol–formaldehyde resins, alkaline hydrolysis of the cured resins at high temperatures, 1669
——, chain-configurational properties, 659
——, dipole moments of phenol-, *o*-cresol-, and *p*-cresol–formaldehyde resins, 275
Phenolic dispersions, storage stability, 3219
Phenylacetylene, free radical polymerization in bulk and in solution, 407
Phenyl methacrylate, polymerization and copolymerization with diethylaluminum chloride, 2077
Phosphates, poly(alkyl ethylene phosphates) from 2-alkoxy-2-oxo-1,3,2-dioxaphospholans, 1275
Phosphorous oxychloride and phenylphosphonic dichloride, effects on the radical polymerization of methyl methacrylate and styrene, 1549
Photochemical addition of maleic anhydride derivatives to benzene and polystyrene, 877
Photodegradation, of aramids, irradiation in the absence of oxygen, 2353
——, ——, irradiation in air, 2365
——, and photooxidation of polystyrene, dielectric studies, 13
——, of polyethylene, influence of ferric acetylacetonate on model compounds, 2863
Photodimerization of polymer bound anthryl groups and thermal dissociation of the photodimers, 2729
Photoinduced polymerization of isobutylene via formation of the radical-cation, 371
Photoinitiated cationic polymerization, dye-sensitized, 2441
Photoinitiated copolymerization of isobutylene with isoprene in the presence of vanadium(IV) chloride, 2759
Photolysis of poly(methyl isopropenyl ketone) and its model compounds in solution, CIDNP studies, 2747
Photolytic behavior of truxillic and truxinic polyamides, 3123
Photolytic and radiolytic polymerization of *N*-ethylmaleimide in cyclohexene, 1779
Photooxidation, of polymers in the presence of singlet oxygen, 899
——, of polystyrene, effect on its dielectric properties, 1123
Photopolymerization, in the crystalline state, characteristic features of topochemical process and polymer properties, 2113
——, kinetic analysis with a photoinduced chemical reaction calorimeter, 1175
——, of methyl methacrylate by iodine monobromide as photoinitiator, 633
——, of methyl methacrylate by porphyrin–iron(III) complex, 399
Pivalolactone graft copolymers on EPDM, 539
Pivalolactone, structure and properties of copolymers with α-methyl-α-propyl-β-propiolactone, 2617
Plasma polymerization, critical evaluation of conditions, 743
——, distribution of polymer deposition from acetylene and ethylene, 229
——, ESCA investigation of polymer films produced by inductively coupled RF plasmas excited in vinylidene fluoride, 1093
——, effect of discharge power on distribution of polymer deposition, 2587
——, effect of reactor design on distribution of polymer deposition, 313
——, of ethylene and tetrafluoroethylene, 415
Plasma treatment of ethylene–tetrafluoroethylene copolymer, studied by ESCA, 911
Plasmas, ESR studies of trapped free radicals

and polymer deposition in xylene plasmas, 3213
Poly(*N*-acylamides) from bisketenimines and dicarboxylic acids, 667
Polyamide-imides from bismethylolimides and dinitriles, 779
Polyamides based on 2-(2-aminophenyl)-1,1-dimethylamine, high-transition temperature polyamides, 2025
Polyamides, copoly(4,4′-oxanilideterephthalamide-4,4′-phenyleneterephthalamide), 2151
Polyamides, 2,6-diaminobiphenylene as a crosslinking unit in an aromatic polyamide, 2711
——, dilute solution properties of poly(1,4-phenylene terephthalamide) in sulfuric acid, 61
——, the effect of water on the glass transition temperature and Young's modulus of nylon 6, 1229
——, a new pathway from formamidinium salts, 2303
——, having perhydroazepine units, 3035
——, photolytic behavior of truxillic and truxinic polyamides, 3123
——, and polybenzodipyrrolediones from pseudo-diacetylphthaloyl chlorides and diamines, 1735
——, by polycondensation in solution, 1159
——, and polyoxadiazoles from aromatic methyl esters and aromatic amines and hydrazines, side reactions, 1221
——, preparation and properties of polyamides from 2,2′-*p*-phenylenebis-5-oxazolones with diamines, 155
——, sequence distribution of repeating units of copolyamides by interfacial or solution methods, 1991
——, structure and properties of poly(2,5-dimethylterephthalamides), 361
——, synthesis from active 2-benzothiazolyl dithiolesters and diamines under mild conditions, 475
——, synthesis, wet-spinning, and fiber thermal characterization of poly(4,4′-oxanilideterephthalamide) and copolymers with 4,4′-oxydianiline or isophthalic acid, 2141
Polyamidines, oxidative cyclization to polybenzimidazoles, 2275
Polyamino acids, multichain copoly(α-amino acid) prepared by reaction of copoly(L-lysine γ-methyl-L-glutamate) with *N*-carboxy anhydride, of N^{ϵ}-carbobenzyloxyl-L-lysine, 1107
——, multichain copoly(α-amino acid), preparation and properties of multi-N^{ϵ}-poly(γ-benzyl-L-glutamyl)copoly(L-lysine γ-methyl-L-glutamate), 2001
Poly(β-amino acid)s, synthesis and conformational properties of poly(α-isobutyl-L-aspartate), 2237
Polyanions, effect of conformation on the binding of acridine orange, 77
——, excitation energy transfer in the interaction with cationic dye, 2411
Polybenzodipyrrolediones from pseudo-diacetylphthaloyl chlorides and diamines, 1735
Polycarbonates from alternating copolymerization of propylene oxide and carbon dioxide with an alumina supported diethylzinc catalyst, 2383
Polycyclotrimerization reaction in polycyanate synthesis, study of gel formation, 1697
Polydihydropyridazinones from bis(3-benzoylpropionic acids) and aromatic dihydrazines, 163
Polyelectrolytes, poly(*N*-acetylaminoacrylic acid) and poly(aminoacrylic acid), 3275
Polyesteramides, glass transition, 1401
Polyesters, diol sequencing in copolyesters, 2847
——, insertion of oxirane rings into ester bonds, 1643
Polyester, kinetics of polyesterification of succinic acid and ethylene glycol, 1005
Poly-α-ester thermal degradation, 283
Polyethylene photodegradation, influence of ferric acetylacetonate on model compounds, 2863
Polyethylene terephthalate, elastic modulus, 3311
Polyethylene, thermooxidative degradation, structural changes, 2555
Polyimide resins from *N*-substituted bisitaconimide monomers, 137
Polyimides, from bismethylolimides and dinitriles, 779
——, synthesis and properties of alkylene-linked aromatic polyimides, 197
Polymer bound dyes, synthesis and properties of polymeric azine and thiazine dyes, 1853
Polymer bound reagents, reactivity of cobaloxime bound to polystyrene by carbon–cobalt σ bond, 2453
Polymer catalysis, aminolysis of *p*-nitrophenyl acrylate copolymers with acrylamide or *N*,*N*-dimethylacrylamide in aqueous solution, 1059
Polymer catalysts, catalysis of hydrolysis of a Schiff base by a carboxyl-containing poly(ethylenimine) derivative, 1943
——, enhanced nucleophilic reactivity of hydroxamate anions bound to quaternized polyethylenimines, 1865
——, esterolytic activity of copoly[1-alkyl-4- or 5-vinylimidazole/4(5)-vinylimidazole],

1237
——, hydrophobic effects in the esterolytic activity of copoly[1-alkyl-4- or 5-vinylimidazole/4(5)-vinylimidazole], 1249
——, polyethylenimines containing imidazole and amine groups as catalysts for ester hydrolysis, 1265
Polymer degradation in solution, kinetics, 497
Polymer modification of PVC, crosslinking of PVC with 2-dibutylamino-4,6-dithiol-*s*-triazine and MgO, 1981
——, crosslinking of PVC with 2-*R*-4,6-dithiol-*s*-triazine and metal activators, 2055
Polymer modification reactions, polyepiiodohydrin from polyepichlorohydrin, 2343
Poly-*p*-phenylene by polymerization of benzene by aluminum chloride–air–water, 1147
Poly(phenylene oxide), halogen displacement polymerization of halophenols by basic copper catalysts, 379
Polyphenylquinoxalines, linked by *m*-terphenyl flexibilizing groups, 2093
Polyphosphazenes, thermal degradation of polybis(*p*-isopropylphenoxy)phosphazene, 1505
Polypropylene, role of polymer morphology in the oxidation of, 33
Polysaccharides, an analytical evaluation of anhydrosugar polymerizations, 2217
Polystyrene, dielectric studies of photodegradation and photooxidation, 13
Polysulfides, oligomeric alkenyl polysulfide, synthesis and characterization by NMR analysis, 3293
Polysulfones, poly(2-ethyl-2-*n*-butyl trimethylene sulfone), 2999
Polyurethane from 1,4-butanediol and methylene bis(4-phenyl isocyanate), thermal degradation, 1563
Poly(vinyl alcohol)–Cu(II) complex, catalyst for the decomposition of hydrogen peroxide, 447
Poly(vinyl chloride), chlorination, chlorination of 2,4-dichloropentane as a model, 3017
——, ——, chlorination of 2,4-dichloropentane as a model, 3285
——, chlorination of β,β-d_2-PVC as a model for determination of the mechanism, 889
——, modification, crosslinking of PVC with 2-dibutylamino-4,6-dithiol-*s*-triazine and MgO, 1981
——, ——, crosslinking of PVC with 2-*R*-4,6-dithiol-2-triazine and metal activators, 2055
——, preparation and degradation of head-to-head PVC, 2593
——, structure of chlorinated polymer, 2539
Porphyrin-iron(III) complex photopolymerization of methyl methacrylate, 399
Pressure, effect on reactivity ratios, 1017
Propene, polymerization with organomagnesium-reduced titanium(IV) chloride-based catalyst, 1683
Pulse radiolysis study on the initial processes of radiation-induced cationic polymerization of styrene and α-methylstyrene, 729
Pyrolysis GC, thermal degradation studies of PVC with time-resolved pyrolysis GC and derivative TGA, 3139
Pyrolysis, in the mass spectrometer of aromatic polysulfonates and thiosulfonates, 3131
——, of methyl methacrylate–methacrylic acid copolymers, 169
——, thermal mechanism of decomposition of model urethanes, 213

Radiation copolymerization of acrylamide crystals with vinyl monomers, 2899
Radiation degradation of poly(δ-hydroxyisobutyric acid) and poly(glycolic ester), 2721
Radiation effect on polystyrene deposited and grafted on silica gel, 2607
Radiation-induced cationic polymerization of styrene and α-methylstyrene studied by pulse radiolysis, 729
Radiation-induced copolymerization of maleimide and acrylamide in the solid state, 3307
Radiation-induced grafting in the polyethylene–styrene system, 1539
Radiation-induced graft polymerization of butadiene on PVC, kinetic studies, 2873
Radiation-induced polymerization in supercooled state under high pressure, 2645
Radiation polymerization of tetrafluoroethylene in emulsion, polymerization rate and molecular weight, 2929
Radical-cation of isobutylene, formation in the photoinduced polymerization, 371
Radical-cation in photoinitiated copolymerization of isobutylene with isoprene, 2759
Radical reactions, *t*-butoxy radical reactions with vinyl monomers, 1709
——, interaction of polystyryl radical with iron(III)-5-sulfosalicylates, 3019
Rayon, dielectric study of viscose rayon and viscose hydrocelluloses, 2019
Reactions on polymers, photochemical addition of maleic anhydride derivatives to benzene and polystyrene, 877
Reactivity of polymer substituents, aminolysis of *p*-nitrophenyl acrylate copolymers with acrylamide or *N,N*-dimethylacrylamide, 1059
Reactivity ratios, of alkyl methacrylates and triallyl cyanurate, 3009
——, effect of high pressure on, 1017

——, estimation by nonlinear least-squares procedure, 1719
——, improved methods of estimation by considering experimental errors in both variables, 2913
Rubber diffusion effects in the oxidative degradation of vulcanized rubbers, 1575
Rubber, diphenylguanidine accelerated sulfur vulcanization of SBR in the presence of dicumylperoxide, 2969
——, NMR spectra of partially hydrogenated diene polymers, 2667
——, oxidative stress relaxation and the measurement of sol fraction in rubber vulcanizates, 2063
——, phase formation and phase inversion during the precopolymerization of styrene–methyl methacrylate in SBR, 337
Rubber–resin mixtures, viscoelasticity, 2631

Selective initiation of nonconjugated dienes, synthesis of vinyl ether-β-nitrostyrene monomers, 1343, 1359
——, synthesis of vinyl ether–styrene monomers, 1367, 1375
Sequence analysis by ^{13}C-NMR, anionic copolymerization of lactams, 2253
Sequence distribution analysis of acrylonitrile–vinylidene chloride copolymers by ^{13}C-NMR, 3185
Sequence, diol sequencing in copolyesters, 2847
Sequence distribution in methyl methacrylate/chloroprene and 2-hydroxyethylmethacrylate/alkyl acrylate systems calculated from a Monte Carlo model, 1601
Sequence distribution of repeating units of copolyamides by interfacial or solution methods, 1991
Sequence distributions in styrene-benzylidenecyanoacetate esters calculated from a Monte Carlo study, 1595
Silazanes, redistribution of fluorine in α,ω-difluoropolydimethyl-*N*-methylsilazanes, 1391
Siloxane–cycloalkylene polymers, synthesis and thermal study, 483
Siloxane polymers, block copolycondensates containing polysiloxane and polyester blocks, poly(butadiene-*b*-siloxanes), 3165
Siloxanes, block copolycondensates containing polysiloxane and polyester blocks, poly(unsaturated esters-*b*-siloxanes), 3157
——, microheterogeneity in crosslinked polysiloxanes, 597
——, molecular constitution of linear fluorine-terminated oxygen-bridged methylphosphanoxy/dimethylsilane polymers, 1627
Singlet oxygen and photooxidation of polymers, 899
Sodium dimethylformamide, a new organic reagent, 699
Solid state copolymerization of maleimide and acrylamide induced by irradiation, 3307
Solution properties of poly(1,4-phenylene terephthalamide) in sulfuric acid, 61
Solvent effect on radical polymerization of vinyl benzoate, 1789
Sorption of ethanesulfonic acid by nylon-6 containing various numbers of end groups, 2393
Spiro(indoline-isoxazoline) polymers, 2039
Starch, preparation and properties of carboxyl-functional mixed esters of hydrolyzed starch, 2129
Stereoregular polymers from optically active β-propiolactones, 261
Styrene, anionic polymerization by barium or strontium in THF, 1285
——, cationic polymerization by acetyl perchlorate or iodine, common-ion salt and steric structure effects, 503
——, cationic polymerization by metal halide and nonmetal halide initiators, 2675
——, emulsion polymerization, effect of homologous series of alkyl sulfate surfactants, 677
Sulfur dioxide, solvent for the copolymerization of styrene and α-methylstyrene, 2431
——, solvent for the homopolymerization of styrene and α-methylstyrene, 2423
Supported catalysts, bis(indenyl)- and bis(fluorenyl)-chromium catalysts for ethylene polymerization, 771
Suspension polymerization of vinyl chloride initiated by *in situ* generated diisobutyryl peroxide, 2091

Teflon, sorption of iron pentacarbonyl, 3013
Template polymerization, of methyl methacrylate in the presence of isotatic poly(methyl methacrylate), 427
——, polymerization of methyl methacrylate in the presence of polystyrene, 3001
Termination rate in radical copolymerization, 2725
7,7,8,8-Tetracyanoguinodimethane salts containing polycation polymers, stability and electroconductivity, 3259
Tetrafluoroethylene, plasma polymerization, 415
2-Tetrazoline-5-thione containing polymers, 2403
Thermal decomposition, mechanism of model urethanes, 213
——, of polysulfones studied by GC or GC/MS, 353

——, of poly(vinylidene chloride) prepared in the presence of oxygen, 1211
Thermal degradation, of ammonium polymethacrylate and polymethacrylamide, 2465
——, blends of polystyrene with polybutadiene, 2169
——, influence of ammonium polyphosphate on the degradation of poly(methyl methacrylate), 95
——, of mixtures of poly(methyl methacrylate) and silver acetate, 2225
——, of polybis(*p*-isopropylphenoxy)phosphazene, 1505
——, of poly(cycloalkylidene carboxylates), 283
——, of the polyurethane from 1,4-butanediol and methylene bis(4-phenyl isocyanate), 1563
——, studies of PVC with time-resolved pyrolysis GC and derivative TGA, 3139
Thermal oxidative degradation of nylon 66 and polyacrylonitrile, HCN evolution, 2715
Thermomechanical analysis of polyphenylquinoxalines linked by *m*-terphenyl flexibilizing groups, 2093
Thermooxidative degradation of polyethylene, structural changes, 2555
Titanium(IV) polyamines, synthesis and reaction variables, 2963
Transition–metal η^3-allyl complexes, reaction products with titanium chloride in the polymerization of isoprene, 2159
Transition-metal catalysts in the polymerization of alkoxyallenes, 615
1,3,5-Trithiane and its derivatives, ESR study of γ-irradiated material, 2989
Trivinylaluminum in cationic polymerization, 821, 833

Urea–formaldehyde resins, characterization by ^{13}C Fourier transform NMR spectroscopy, 2509
Urea oligomers, selective reactivity of 1-(*N*-substituted-carbamyl)aziridine for ring-transformation reactions and ring-opening polymerization, 1037

Vinylation of organic halides with trivinylaluminum as a model for termination in cationic polymerization, 821
5(6)-Vinylbenzimidazole, synthesis and polymerization, 627
N-Vinylcarbazole, copolymerization with diethylazodicarboxylate, 1167
——, polymerization by Grignard reagents, 971, 3025
Vinyl chloride, high-pressure polymerization, 1413
——, mechanism of polymerization, 2741
——, polymerization at subsaturation pressure with emulsion PVC as seed, 645
Vinyl chloride block copolymers, ozonized polypropylene oligomers as heterofunctional initiator, 3077
——, synthesis and characterization of vinyl chloride block copolymers, 3091
——, physical properties and morphology of block copolymers of PVC, 3107
Vinylcyclohexane and methylvinylcyclohexane, copolymerization with acrylonitrile, 3233
Vinylene carbonate, polymerization in DMSO, 845
Vinylidene chloride, thermal decomposition of the polymer prepared in the presence of oxygen, 1211
Vinylidene fluoride, polymer with low head-to-head imperfections, 3039
Vinylimidazole, esterolytic activity of copoly[1-alkyl-4- or 5-vinylimidazole/4(5)-vinylimidazole], 1237
——, hydrophobic effects in the esterolytic activity of copoly[1-alkyl-4- or 5-vinylimidazole/4(5)-vinylimidazole], 1249
4-Vinylpyridine perchlorate, polymerization in micellar aggregates, 1495
Vinylpyrrolidone, copolymerization with aromatic methacrylates, 715
Vinyl stearate, electron diffraction studies of multilayers, 1431
Viscoelasticity of rubber–resin mixtures, 2631
Vulcanization of SBR in the presence of dicumylperoxide, effect of diphenylguanidine, 2969

Wood pulp, dielectric properties, 1443
Wool, graft copolymerization of poly(vinyl acetate) by Fenton's reagent, 1801

Ziegler-Natta polymerization, labeled triethylaluminum cocatalyst for determination of the number of active centers, 3301
Ziegler-Natta-type polymerization of propene by organomagnesium-reduced titanium(IV) chloride-based catalyst, 1683

New Information for Authors

With the advent of a new U.S. copyright law effective January 1978, the transfer of copyright from author to publisher, heretofore implicit in the submission of a manuscript, must now be clearly stated in writing to enable the publisher to assure maximum dissemination of the author's work. Therefore, the following agreement, executed and signed by the author, is now required with each manuscript submission. (If the article is a "work made for hire" it must be signed by the employer.) *If you wish to submit a manuscript to the editors, please attach a copy of this page, filled in and signed.*

Transfer of Copyright Agreement

(Must be signed and returned to the Journal Editor before the manuscript can be considered for publication.)

The article entitled_____

is herewith submitted for publication in _____.
It has not been published before. If and when the article is accepted for publication I, as the author, hereby agree to transfer (for U.S. Government employees: to the extent transferable) to John Wiley & Sons, Inc., all rights under existing copyright laws except for the following, which the author(s) specifically retain(s):

1. The right to make further copies of all or part of the published article for my use in classroom teaching;
2. The right to re-use all or part of this material in a compilation of my own works or in a textbook of which I am the author;
3. The right to make copies of the published work for internal distribution within the institution which employs me.

I agree that copies made under these circumstances will continue to carry the copyright notice which appeared in the orginal published work. I agree to inform my co-authors, if any, of the above terms.
